

Dart- Task 1

Dart Basics

Dart

Flutter

by Max Berkold & Max Steffen

Read a variable from console

- Ask the user to enter a variable
- Read variable from console as `String`
- Important, before you can use the hint, you need to change your default console in VS Code (<https://stackoverflow.com/questions/71946458/exception-global-evaluation-requires-a-thread-to-have-been-loaded-on-vscode-wh>)
- (Hint: stdout / stdin)

Hints

- Use the package `import 'dart:io';`
- You can use `stdin` and `stdout` to read and write to your console
- For more information about it:
<https://dart.dev/tutorials/server/cmdline#reading-and-writing-with-stdin-stdout-and-stderr>

Feedback

- Go to our discord server (<https://discord.gg/N8sGhCWgX6>)
- Post your solution in an own thread under "Course Members" -> "tasks"
- When you do not see "Course Members", write us a short message in discord and we give you access.
- Look into other solutions and discuss different solutions.
